output voltage adjustable No; -				
relative overall tolerance of the voltage 3 %				
relative control precision of the output voltage				
• on slow fluctuation of input voltage 0.1 %				
• on slow fluctuation of ohm loading 0.2 %				
residual ripple				
• maximum 150 mV				
voltage peak				
• maximum 240 mV				
display version for normal operation Green LED for 24 V C	OK			
behavior of the output voltage when switching on No overshoot of Vout				
response delay maximum 6 s; 2 s at 230 V, 6 s				

voltage increase time of the output voltage	
• typical	10 ms
output current	
rated value	2.5 A
rated range	0 2.5 A
supplied active power typical	60 W
short-term overload current	
 on short-circuiting during the start-up typical 	6 A
 at short-circuit during operation typical 	6 A
duration of overloading capability for excess current	
on short-circuiting during the start-up	100 ms

security information		
security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates,
